Bottleneck Identified:

- After trade proposal approval from Joanna's team, the trader need to reach out for Shivam's approval rather than it is getting directly assigned to Shivam for approval

- Shivam or only one of his deputy is authorized to approve (in his absence) and not all

- No specific timeline is assigned for approval

- All trade proposal need approval from Kiran's team

Possible Solution Suggested:

- Trade will get directly assigned to Shivam and team for final approval post go-ahead from Joanna's team

- Only selected trade meeting specific criterion/ threshold will need the Shivam's approval

- Auto approval after specific time, if trade proposal is pending with Shivan and team and got go ahead from Joanna's team

- Shivam and all his deputies can approve the Joanna team's approved trade proposal

- Set the specific timeline for the proposal approval / rejection

- Eliminate the need for Shivam's approval
